

## Traffic Products

### Paints & Anti-slip Coatings

#### Cataphos Traffic Paint - Chlorinated Rubber, One Pack Epoxy and Water Based

Over years of continued development, Ennis Prismo can now offer a full range of traffic paints to meet every application from factory car parks to airport runways.

Manufactured to a demanding specification Cataphos Traffic Paint is easy to apply and highly durable.

- Cataphos Chlorinated Rubber Premium is the market leading, high quality line marking paint.
- Cataphos Chlorinated Rubber Standard is the answer to economic line marking.
- Cataphos Water Based paints are solvent free, fast drying and environmentally friendly.
- Cataphos One Pack Epoxy paints are highly durable and ideal for concrete.

Cataphos solvent is available for brush or equipment cleaning.

#### The Benefits

- Highly durable, approved for use on highways
- Extensive range of bright, fade resistant colours
- Designed for a single coat application
- Suitable for asphalt or concrete
- Easy to apply by brush, spray or roller

**Please note:**  
different textured finishes provide different practical coverage rates - always carry out a test patch.

	CR Premium	CR Standard	One Pack Epoxy	Water Based
Approx Rate of application (per litre)	25mtrs x 100mm wide	25mtrs x 100mm wide	25mtrs x 100mm wide	42mtrs x 100mm wide
Approx. Covering Capacity @350 microns wet film thickness	2.5m <sup>2</sup> per litre	2.5m <sup>2</sup> per litre	2.5m <sup>2</sup> per litre	4.2m <sup>2</sup> per litre
Specific Gravity (Approx)	1.5kg per litre	1.54kg per litre	1.45kg per litre	1.65kg per litre
ASTM Wheel Dry Time	15 mins	15-20 Mins	10 Mins	10 Mins
Shelf Life	12 months	12 months	12 months	12 months

Surface Preparation	Clean, dry and free from dirt or grease	Clean, dry and free from dirt or grease	Clean, dry and free from dirt or grease	Clean, dry and free from dirt or grease
Flash Point	4°C	4°C	6°C	N/A Solvent Free

CR Premium and Water Based is available in white, yellow, black, red, blue & green. 5 litres white, yellow, black, blue, red & green. 20 litres white, yellow and black. Water based is available in 5 litres or 5 gallon drums. CR Standard is available in white or yellow and One Pack Epoxy is available in white and yellow in 20 litre drums.

## COLOURSAFE - Anti-slip surface coating

A quick and cost effective way of increasing pedestrian safety and producing an effective anti-slip surface for car parks, walkways, cycleways and many light traffic applications.

- Easy to apply no specialist equipment required
- Suitable for asphalt or concrete (see below\*)

<b>Covering Capacity</b>	2 coats @ 300 microns wet film thickness gives 32.5m <sup>2</sup> per 16 litre drum*
<b>Drying Time</b>	ASTM wheel dry time 15-20 minutes
<b>Shelf Life</b>	6 months
<b>Surface Preparation</b>	Clean, dry and free from oil or fuel contamination
<b>Flash Point</b>	4°C
<b>Application</b>	Brush, roller, squeegee or aggregate spray machine

Standard colours available  
Other colours available to order.  
Colour swatches are available on request.

\*Please note ColourSafe is not suitable for uncompacted asphalt eg playgrounds and tennis courts. A test area is always recommended before proceeding with the main application. Different textured finishes may provide varying practical coverage rates, always carry out a test patch.

## EASYMARK PERMANENT

This CFC free, fast drying aerosol marking paint is a durable line marker ideally suited for quick application in a wide variety of situations including car parks, factories, playgrounds, sports centres and warehouses.

Used with the Easymark two or four wheel applicators for line marking, or with stencils for creating letters and symbols. Lasts approximately 6-12 months dependant upon trafficking.

Easymark is simple to apply with no specialist skills required, resistant to most chemicals and achieves 100 metres of 50mm wide line from every 750ml can.

The product is also non-harmful to the environment and aquatic life.

colours available

## EASYMARK TEMPORARY

The contractors answer to economic temporary marking.

This fast drying temporary spray paint is ideal for line and spot marking low wear applications or where markings do not need to remain after work has been carried out.

The product lasts approximately 6 weeks dependent upon trafficking but can be instantly removed with a pressure hose and a brush if required.

Ideal for marking on asphalt, concrete, soil, grass, metal, timber, sand and gravel. Perfect for water, gas, cable and electric company use.

## STENCIL KIT & HAND SPRAY UNIT

Ideal for marking letters and numbers just about anywhere. The Stencil Kit is 12 inches high and contain letters A-Z and numbers 0-9.

## LINE LAZER - Airless line marking machine

The Line Lazer® is the ideal line marking machine for the efficient and accurate application of Cataphos®.

Provide fast, accurate results with the best line marking machines for today's road marking products.

The Line Lazer 3400 is ideal for smaller jobs. Although capable of painting only one line at a time, it's size, light weight and new features make the Line Lazer 3400 ideal for maintenance work, car parks etc.

Line Lazer 3900 & 5900 deliver precise and consistent lines. Designed to operate with single or twin gun. The performance of these versatile line marking machines meet the requirements of local authorities and towns making them ideal for car park, road and airport marking.

Other variations in the range include the Line Lazer Hydraulic and the Line Driver, which transforms the Line Lazer into a ride-on, push and pull hydrostatic driver. The Line Driver doubles production rates and improves line quality whilst reducing operator fatigue.

### The Product

- Sprays solvent, water or rubber based paints without thinning
- Single or twin gun options available
- Integrated setting device for both solid and broken lines
- Offers considerably less overspray than air spray systems
- High powered, petrol driven Honda engine
- Hard chrome stainless steel piston pumps for a longer working life
- Detachable guns for stencilling and all general painting jobs
- Speedy gun rotation makes it easy to alternate from marking lines to spraying curves instantly

## GRINDLAZER

The GrindLazer is the solution for all your line marking removal requirements. It has been designed to minimise end user fatigue and drastically reduce vibration whilst effectively removing lines from just about any surface.

## THERMOLAZER

The ThermoLazer is a user-friendly, innovative thermoplastic line marking machine. Designed to melt down and apply almost all thermoplastic marking materials. Ideal for single lines, double lines or stencilling on car parks, airports, roads etc.

# Company Overview

Ennis Prismo Traffic Safety Solutions is the global market leading manufacturer of road markings, surfacings and traffic safety products.

Formerly known as Prismo Road Markings Limited, the company is now part of Ennis-Flint; the world leader in road safety products.

Ennis-Flint dominates the Americas markets, as well as supplying in to Asia Pacific, while Ennis Prismo has built an equally strong position across Europe, the Middle East and Africa.

As a result, we are able to offer a truly global service that we believe is unrivalled in the road safety industry. Our areas of expertise include:

- **Road markings**
- **Road studs**
- **Surface safety solutions**
- **High friction surfacing**
- **Coloured and decorative surfacing**
- **Bridge expansion joints**
- **Sealing and crack repair systems**
- **Road marking performance analysis**
- **Traffic products**
- **Surface graphics systems**

Our multinational sales, logistics and manufacturing operations, combined with our extensive product range and over 100 years experience, mean that Ennis Prismo Traffic Safety Solutions is uniquely placed to meet your road safety requirements.
